

YRPC GAZETTE

The York Region Parrot Club

Year 7, Issue 8

March 2007

The YRPC's mission statement:

We're dedicated to the preservation and enhancement of pet birds and the education of their owners.

It is recommended that anyone bringing birds to meetings have a health examination done by an avian veterinarian.

Toy-Making Night

March is toy making night. It's always a great night and the birds and people seem to have a great time. Since toy making has been an annual event for a few years now the club has amassed lots of bits and pieces so we won't need any member donated items this year. We only ask that you bring some bird safe rope or twine and a pair of scissors for cutting. Kent will be on hand again this year with his power tools to make sure everyone plays safe. If any member wishes to bring their own tools that would be great but it is not required. We will also have some sample toys for small, medium and large birds to help get your creative juices flowing. See you on March 20th.

FEBRUARY MEETING RECAP

Announcements

- Denise mentioned about signing up for the All About Pets Show: April 6 – 8, anyone still wishing to participate should contact Denise
- Kimberly encouraged members to participate in the community outreach to the nursing home where she is presently doing her placement

February was Product Promotion Night

Justin Bailey – Austin Air Purifiers

- Justin gave a brief explanation on how Austin Air Purifiers work, in particular how one of their products is designed especially for homes with pets
- Austin Air Purifiers are not sold through store outlets but through sales reps such as Justin – they are the #1 company in sales of air purifiers
- the purifiers are a hepa based product designed to eliminate 99% of all dust and dander
- they are a low energy machine, therefore cost effective in terms of electricity used
- sizes range from small: cleaning capacity of 700 sq. feet to a large unit capable of
